Che cos'è l'ergonomia?

L'ergonomia sul lavoro riguarda le interazioni fra gli operatori e le loro attrezzature di lavoro, il loro ambiente di lavoro e il processo produttivo.

I sistemi di lavoro, progettati ergonomicamente, aumentano la sicurezza, il rendimento, l'efficienza, migliorano le condizioni e le prestazioni di lavoro e di vita dell'uomo, contrapponendosi agli effetti avversi sulla salute.

La pratica migliore con ErgoSense™

Desoutter promuove, in ogni momento, l'uso della Miglior Pratica Ergonomica fra i suoi clienti, ed è lieta di stabilire partnership lavorative per aiutare a raggiungere questa meta. I seguenti punti mostrano come questo può essere raggiunto.

Le persone

Ciò comprende non solo le persone che useranno un utensile adeguato, ma anche quelle persone che lavorano vicino all'utensile, dato che possono essere infastidite dal rumore, dalla polvere, etc. La loro salute, prima di iniziare a lavorare con o vicino ad un utensile potente, deve essere valutata e controllata quando l'utensile è in uso. Prima di utilizzare un utensile potente, l'addestramento è ovviamente molto importante, e Desoutter è ben lieta di fornire una guida e materiale di formazione specifico per l'utilizzo dei nostri prodotti.

L'ambiente

E' necessario prestare attenzione agli aspetti dell'area lavorativa come, riscaldamento, comfort, rumore, polvere ed altri ancora. I nostri venditori Desoutter possono fornire una guida sui livelli di esposizione e gli altri requisiti.

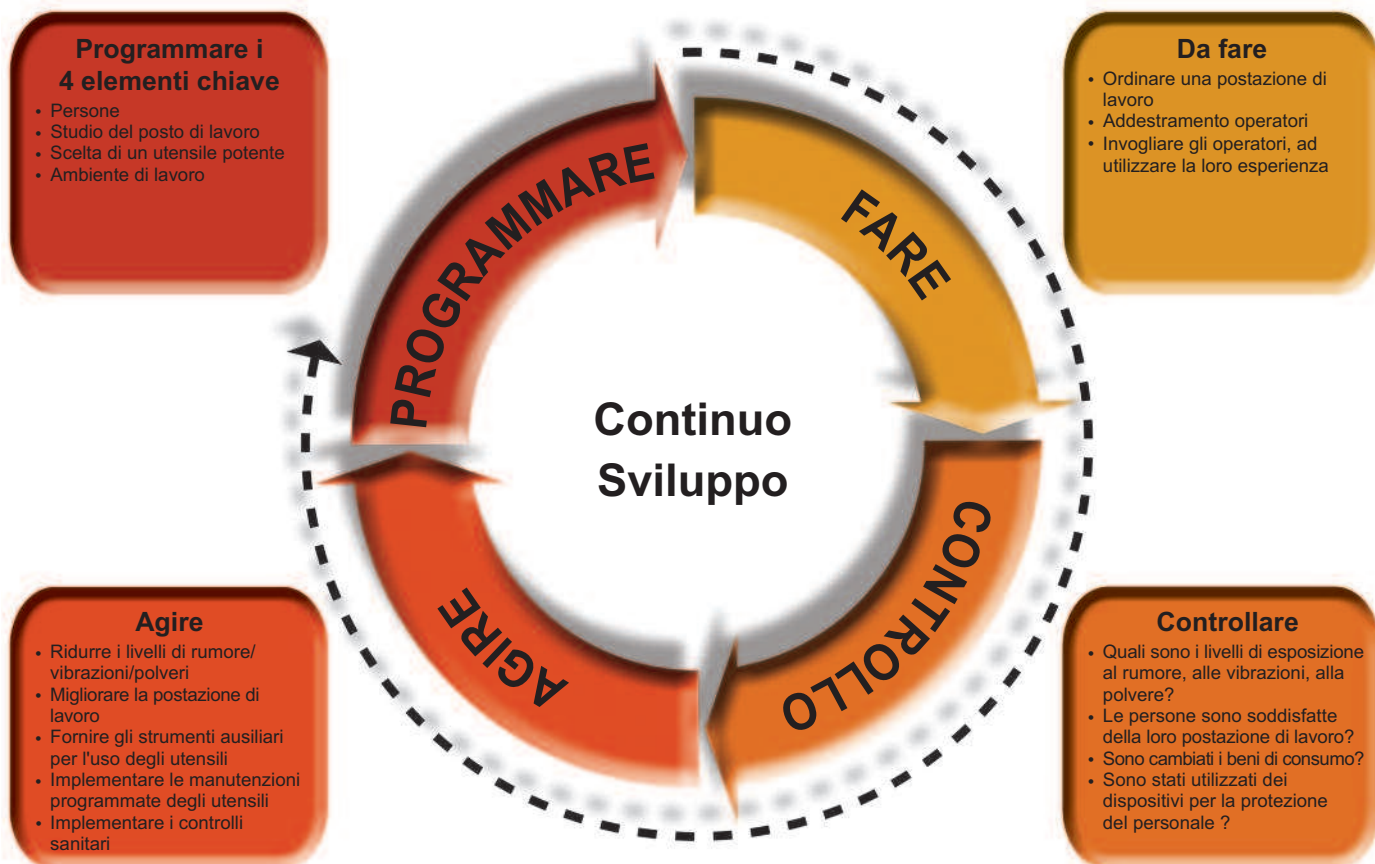

Task Design

La progettazione del posto di lavoro e il modo in cui un lavoro viene svolto, sono decisivi nell'evitare problemi a lungo termine. Argomenti critici includono: progettazione del posto di lavoro, posizione neutra del polso, scelta corretta dell'utensile per il lavoro da eseguire, progettazione dell'attrezzatura per la lavorazione del pezzo e messa a disposizione di strumenti ausiliari come impugnature laterali, supporti, bilanciatori, etc.

Scelta di un utensile adeguato

Gli utensili Desoutter incorporano la più recente linea di pensiero sui principi ergonomici. Le caratteristiche ad esempio sono:

- Forma e dimensioni corrette per la migliore impugnatura
- Reazioni a coppie basse, carichi e sforzi ridotti da parte dell'operatore per ottenere il massimo comfort
- Basse emissioni di rumore/polvere/vibrazioni/olio, aiutano a migliorare l'ambiente di lavoro
- Conformità a tutte le normative vigenti

Normative internazionali sull'ergonomia

Desoutter ha una lunga storia di partecipazione attiva con l'Organizzazione internazionale per l'Unificazione, ed altre organizzazioni non governative responsabili di formulare le norme, che ora sono accettate a livello internazionale. Il personale Desoutter partecipa a commissioni, gruppi di lavoro e associazioni commerciali per garantire che le norme siano aggiornate e che gli sviluppi della legislazione e delle normative siano divulgate in ogni parte del mondo. Desoutter è lieta di condividere le sue conoscenze con i suoi clienti tramite il Programma Ergosense. Vi invitiamo quindi a chiamarci.
